Summary

B.Tech CS student at CUSAT building full-stack applications with React, Vue, Node.js and PostgreSQL, from payment systems to serverless business platforms. Interning at Cognifyr on real ERPNext business workflows, and looking to grow as a backend-focused engineer on reliable, AI-integrated systems.

Education

Cochin University of Science & Technology (CUSAT) 2024 – 2028
B.Tech in Computer Science Engineering — CGPA: 8.82 *Kochi, India*

Experience

Full Stack Web Developer Intern Jun 2025 – Present
Cognifyr (CITTIC, CUSAT) *Kochi, India*

- Contributed to CogniHR, an HR platform on Frappe/ERPNext v16 covering all HRMS modules plus employee and organisation pages, in Vue.js and Nuxt 3; used Claude Code, Cursor and Antigravity to speed up frontend work.
- Helped build an ERPNext lead-to-cash workflow (lead, deal, custom estimation, quotation, sales order, then project scheduling and invoicing/payments) with vendors, payables, expenses, and quarterly and annual statements.
- Worked on role-based HR admin and employee permissions and a Dockerized ERPNext + HRMS setup; supported teammates on shared modules.
- Redesigned and built the company website (cognifyr.co) in Vue; live in production.

UI/UX Design Intern May 2025 – Jun 2025
PHICSIT InfoTech Pvt. Ltd *New Delhi (Remote)*

- Redesigned osci.osconnect.org and nexfellow.com in Figma (wireframes, mockups, responsive layouts) with a team of 3 designers; this design background shapes how I build usable frontends.

Projects

Fundo – College Event Payment Platform GitHub | Live
React, Tailwind, Express, PostgreSQL, Socket.io, Redis, BullMQ, Docker

- Built solo to replace cash and WhatsApp-screenshot fee collection; tested with 10+ users.
- Integrated Razorpay (test mode) with webhook and HMAC signature verification to reject forged payment confirmations.
- Socket.io live organiser dashboard, BullMQ + Redis queue for confirmation emails, JWT roles for organisers and students, CSV export.

FlowDesk AI – AI Customer Request Routing GitHub
React, Node.js, Express, PostgreSQL, Prisma, Gemini AI, BullMQ, Redis, Socket.io, Docker

- Ingests Telegram and WhatsApp messages, classifies them with Gemini AI via async BullMQ jobs, and routes them to a live admin dashboard.
- JWT access/refresh auth with admin and agent roles; audit trails and internal notes per request.

Real Estate Management Platform – Serverless Property & Portfolio System GitHub
Nuxt 4, Vue 3, Pinia, TypeScript, Cloudflare Workers, Cloudflare D1

- Manages buildings, units, tenants and lease templates, with rent schedules, PDF invoices, and cash, bank and post-dated-cheque collection.
- Recognises revenue monthly regardless of billing frequency; occupancy, vacancy and profitability reports; residential-exempt vs commercial-taxable VAT classification with CSV export.
- PBKDF2-SHA256 hashing, short-lived signed access tokens with rotating refresh sessions, role-scoped organisations and audit logging; covered by automated tests and a production smoke suite.

Hackathon Projects Echo | Financial RAG

- **Echo**: AI hearing-assist app (Flutter, Express, WebSockets, LLM). Built the backend and audio streaming; showcased at VIBHAVA Summit, CUSAT.
- **Financial RAG**: hybrid RAG over financial documents, fusing ChromaDB vector retrieval with a spaCy-built Neo4j knowledge graph; scores answers for hallucination and re-prompts until they clear a threshold. Runs locally (Mistral via Ollama).

Technical Skills

Languages: JavaScript, TypeScript, Java, C, C++, Python, SQL
Frontend: React, Next.js, Vue.js, Nuxt 3, Tailwind CSS, Vite
Backend: Node.js, Express, REST APIs, WebSockets, BullMQ, ERPNext/Frappe, Prisma, Cloudflare Workers/D1
Databases & Tools: PostgreSQL, MongoDB, MySQL, Redis, Supabase, Docker, Git, Postman, Figma, Linux
AI-Assisted Dev: Claude Code, Cursor, Antigravity
Problem Solving: Data structures and algorithms in Java (LeetCode); tutor peers in DSA at ACES CUSAT

Extra Curricular Activities

DSA Tutor Aug 2026 – Present
ACES CUSAT *Kochi, India*

- Teaching data structures and algorithms to fellow CS students.

Web Developer Jun 2025 – May 2026
ACES CUSAT *Kochi, India*

- Built the acescusat.tech website with the tech team for a 180+ member CS association.
